

Statement of intent

Design Technology

At Vicar's Green:

- Design and Technology is an inspiring and practical subject; it encourages children to learn to think and intervene creatively to solve problems both as individuals and as members of a team.
- We encourage children to use their creativity and imagination to design and make products that solve real and relevant problems within a variety of contexts, considering their own and others' needs, wants and values.
- We aim to, wherever possible, link work to other subjects such as maths, art and computing. We provide children with opportunities to become innovators and risk-takers.
