

# Statement of intent

## Maths

At Vicar's Green our children will::

- Experience a sense of awe and wonder as they solve a problem for the first time, discover different solutions and make links between different areas of mathematics.
- Have the opportunity to use a wide range of models, visual manipulatives and practical resources to develop a deep conceptual understanding alongside procedural fluency.
- Be encouraged to develop a 'can do' attitude, especially when problem solving and pattern sniffing.
- Confidently reason about their mathematics, using appropriate mathematical language, recognising its importance for communication and deep thinking.
- Broaden their knowledge and understanding of how mathematics is used in the wider world by making rich and varied real life connections.
